

It's trade fair time again...

*... and, for us, that means that we're currently knee-deep in preparations for **ZOW**.*

*We are already looking forward to greeting you at our **stand E-058** from 6th to 8th February.*

What's new to see?

The focus lies on our new surfaces: The "facet shine" with numerous levels of shine, and a super-soft surface that has a level of shine of less than three points. Be impressed by these surfaces!

The decors that we will be presenting at ZOW represent current trends. Naturalness is mixed with rusticity. Clear, elegant structures create a feeling of lightness. And, with bold designs, we take things a step further.

See you at ZOW!
